

BREAST CANCER

is the major global burden of morbidity and mortality in women. The optimal care of Breast Cancer patient is rapidly changing with advances in the patient care including Prevention, Screening and Detection as well as in the Primary treatment modalities of surgery, radiation therapy, hormonal therapy, cytotoxic chemotherapy and novel biological agents.

So, let us join together to enrich our knowledge and come forward as a team for care of the patients of Breast cancer. This scientific discussion aims to share recent trends and advances in the treatment of Carcinoma Breast with impact of Breast Cancer Awareness Programmes.
