

Director's message

Dear Students/People,

Education is a social activity of the highest order, and true education seeks to develop the innate inner capacities of man. Apart from imparting knowledge, understanding, skills, interests, attitude, and critical thinking, it brings about an intellectual awakening by which a man is enabled to see beyond the apparent and become the architect of true future of the society he operates in.

The future of the country depends on the youth being employed and contributing positively to the growth of the economy.

India has always treasured its educational endows of yore which were acclaimed the world over for being Centre's of excellence.

Our envisaged goal of “**Shiksha, Sanskar and Sewa**” would be our humble tribute to a vibrant India. We strongly believe that lack of skill, infrastructure, training and resources should not be an impediment for the development of the country. We consider it our sacred duty of providing an academic ambience of international standard in which innovative pedagogic involvement of global significance can be rendered rewarding, fruitful, and inspiring for all kind of students.

The training pedagogy is structured in such a way that the student is able to get “Hand-on-training” through the various “**on-the-job-training**” that the student has to undergo when getting associated with our institution. The emphasis is totally on Skill Enhancement in collusion with the “**Skill India**” Campaign. It is only through Skilling and Training that our youth can become a successful professional and also a worthy citizen of the country. I am sure that your association with **SICT INDIA** will be a journey into rediscovering your potentials and inventing yourself to be a part of a fabulous global community.

Best Wishes!!

DR. BIPIN KUMAR

Founder Secretary & Sr. Director

SICT (Smart Institute of Computer Technology)
